Product description

Rechargeable 200 lumen LED pen light with dimmer function and built-in magnets

WORK PEN 200 R is a rechargeable penlight that is part of the upgraded FLASHLIGHT range. A real work light for professional inspection work – always at hand!

The LED penlight provides extremely powerful illumination, both from the lamp head (up to 200 lumen) and precision top light (150 lumen) which is quite exceptional for such a small penlight. A side switch ensures easy single-handed switch on/off operation. It also features a stepless dimmer function in the range of 10% to 100% that enables you to easily adjust the light output and only use the light necessary for the specific job.

Featuring a durable aluminum construction with a comfortable grip, the design is slim and compact allowing access in the most inaccessible places.

WORK PEN 200 R comes with built-in magnets for suspension or storage - both in the clip and at the bottom of the penlight. This gives you increased flexibility as you can easily position the light, if you need to get your hands free during work.

The LED pencil light is easily rechargeable with USB cable, which avoids time-consuming, annoying replacement of batteries. Charging indicator at the front shows charging status. Supplied with a clip for the pocket, right at your fingertips.
