Product description

Compact LED work light with new CCT SCAN function for car detailing and colour match

SUNMATCH 4 is a rechargeable and handy LED work light always at hand for detailing and colour match.

Compared to the previous model, SUNMATCH 4 features a unique, stepless CCT SCAN function. By activating the CCT SCAN function, the handlamp will automatically scan the surface of the object with the entire colour temperature spectrum ranging from 2500K to 6500K. At any point, the CCT SCAN function can be locked, and in this way, you will be able to customize the light to the specific task. This provides optimum conditions for the most accurate colour match and highlighting and discovering paint defects. SUNMATCH 4 also features stepless dimmer function in the range of 10 % to 100 %. A spotlight for inspection is also included at the top.

Durable LED work light with high flexibility
SUNMATCH 4 is always ready to use and easy to find when placed in its charging base after each job. Place the LED work light anywhere you want during inspection with the turnable sturdy hook or the strong built-in magnet. The flexible lamp head tilts up to 180 degrees.

With its durable construction, SUNMATCH 4 is both dust and waterproof, IP65. It is also supplied with a solvent resistant glass lens and a battery indicator at the front that shows when the battery must be recharged.

To avoid overheating the handlamp, a built-in intelligent heat protection system switches to low mode (50%) after 3 minutes continuous use at high mode.

1 x SCANGRIP DIFFUSER SMALL is included in the box. The diffuser provides a soft and diffused light without harsh shadows. In addition, blinding and reflections are reduced. The diffuser can easily be mounted on top of the lens.
Why you should choose SUNMATCH 4?

- Handy LED work light for detailing and colour match providing up to 500 lumen
- Features CCT SCAN reflecting the entire colour temperature spectrum from 2500K to 6500K
- Compact and flexible design
- Battery indicator at the front
- Dust and waterproof, IP65
- Small diffuser included to provide a soft and diffused light

// Replaces 03.5651 SUNMATCH 3 which will be discontinued.
Lighting solutions for the painting industry

Being the most comprehensive and sophisticated of its kind in the world, the new generation SCANGRIP lights for the painting industry are made for colour matching, detailing and general paint work and are usable everywhere a painted surface needs inspection.
CRI+ for accurate colour match

With our lighting solutions for the painting industry, we're making use of the CRI+ term defined as an average of all 15 R-values. This is the only correct definition of the CRI value to be used for accurate and reliable colour recognition.
