Product description

SPCS - 50 SK "Master" set - compression pressure gauge for diesel engines with recording of the measurement with quick coupler connections.

Measuring range: 1.0 to 5.0 MPa (10 to 50 bar)

The measurement results are recorded on the diagram that the meter is equipped with.
One diagram can save 8 results of compression pressure measurements in diesel engine cylinders.

The measurement is made using the adapters included in the set.
The measurement can be made through the glow plug hole or through the injector hole on diesel engines.
The equipment includes measuring tips (adapters) for the most popular car brands.
We offer over 100 different types of adapters that can be purchased separately or in sets.
The set includes 15 pcs. of adapters mounted in place of glow plugs and injectors for the most popular models of Diesel engines.

Connectors:
- Compression measuring device with a handle equipped with a starter switch and a vent (drain) valve 912 201 00 (91220100)
- Pressure hose with check valve, length 360 mm 912 202 00 (91220200)
- Adapter (measuring tips) replacing the atomizer:
  A - 912 011 00 (91201100),
