Product description

Set for diagnostics of fuel injection systems in:
- gasoline engines (low pressure in FSI systems and similar)
- Diesel Common Rail engines (low pressure - power supply)

The device works with connectors from the JETRONIK SK set (the same type of quick connectors).

The kit allows you to check:
- tightness of the system
- patency of the system
- nominal working pressure of the system

The device is "connected" between the fuel tank and the feed pump / high pressure pump - depending on the type of engine.

Kit components:
Transparent plastic tee with valves and fuel drain valve
Manovacuometer -1 - 3 Bar
Manovacuometer -1 - 15 Bar
Connection hose 1.5 m (2 pcs)
Hose ø 6 with a band (2 pcs)
Hose ø 8 with a band (2 pcs)

Packaging - plastic suitcase
