Product description

version Profi +

Very useful and handy multi-purpose tester designed for one-handed operation

- electrical testing 6 - 24V in cars, trucks and motorcycles
- LED light illuminates the work area
- easier to solve problems by switching the polarity
- very useful for measuring the ignition, fuel injection and other pulsed power systems
- Read the measured voltage backlit display
- Built-in cable continuity tester with optical signal
- measuring the frequency to 8000 Hz
- 6 foot cord allows for comfortable operation
- polarity tester for testing vehicles or trailers
- polarity reversal adapter connected to the battery
- device connected to the battery or cigarette lighter
- A special tip for measurements on deep plugs
- 6 adjustable degrees threshold voltage of 0.5 V - 1.0 V - 2.0 V - 5.0 V - 10.0 V - 48 V
- acoustic signal when the set voltage
