Product description

It is a device used to transfer the lubricant to reach hard: the gearbox. driving axles. It is made of a steel cylinder with a capacity of 200 ml. they work hand-driven plunger. The piston has a seal of high-resistant rubber for longer periods of grease and oil. All seals are made with great precision and let you work under pressure to 70 MPa. The syringe has a vent system. which equalizes the pressure under the piston. which improves its efficiency and workflow.
