Product description

For the regeneration of ABS sockets, which are damaged when removing the sensors, corrosion and dirt prevent their easy removal, often reaming is also required.

Only a well-prepared and cleaned socket allows for proper installation of new sensors.
Incorrect installation or assembly of damaged sensors causes faulty measurements and operation of the ABS system.

Fine-pitch cutters ensure thorough and axial cleaning of the socket, the ratchet allows for one-handed operation, which facilitates work and prevents damage to the reamer.

Cutter dimensions: 18 x 45 mm

Applicable to cars:
- Audi,
- VW,
- seat.
- Skoda,
- BMW E36 and E46,

German production.
