Product description

Includes 4 single and 1 double wheel lock timing - used for single, double or four-piston reciprocating engines, when replacing the belt in a special body, anti-slip material, two zasiki screw. Made in Australia. Timing wheel diameters from 101 to 152mm. The distance between the wheels from 1.6 to 76mm. Patented konkstrukcja allows the use of many types of engines, modules wheel and teeth. The patented, highly effective system of locking the wheels is replaced by a whole range of other tools and greatly simplifies the work of the technician. Compact size allows operation in tight areas and hard-to less moving parts and easy to use Made from a special synthetic material, very strong, lightweight and corrosion-resistant
