Product description

for the rapid diagnosis of vehicle electrical system using sockets fuses.

Fast-tracking detection in a circuit. isolate the source of faults, verifies circuits, even when one fuse is connected to several circuits. You can perform tests even while driving a car.

Tester only works when you inserted the fuse, so that circuit is well protected during a test at the same time to check the fuse.

Easy to use and good readability by using the LCD display. Maximum measured voltage: 48V Maximum current: 20A for small plug-in fuse.
