Product description

The set is even suitable for 6 cylinder engines.

A set for measuring fuel flow on the overflows of SIEMENS Common Rail injectors.
Measuring tubes built in a metal cassette with adjustable length of the sling.
Floats are built in the tanks, allowing the comparison of fuel flow in the fuel excess lines of the injectors.
The hoses supplied (12 pcs.) Allow you to connect the injectors' excess fuel circuits and observe the fuel flow during the operation of the injection system for an infinitely long time
compared to the measuring cup set (overfilling the measuring cups
