Product description

The probe of the fuel tank, grip, pump and timer.

Application:
Injector tester is designed for car services, transport bases, workshops, mechanics, agriculture and construction, but also for ordinary users of diesel.

This device allows you to check and adjust injectors in diesel engines. The design of the entire probe and used in the measuring gauge enables testing with the accuracy required by the standards and recommendations of the fuel equipment manufacturers.

Working pressure up to 600 bar

Kit Contents:
- 3 adapters
- The basis for the stabilization of measurement
- The fuel container made of plastics containing precise fuel filter
