Product description

The device protects all electronic systems in the car from the adverse wachaniami voltage during welding, welding, grinding, etc.
Secure the main driver car drivers: ABS, injection, air conditioning, alarm, immobilizer ii nnych electronics before permanent damage.
We need not disconnect the battery which resulted in the loss of data (radio, NAVIGATION, on-board computer settings).

The device was designed to safely use:
- Fully insulated terminals tick
- Properly selected cross sections
- Signaling proper connection
- Sound signaling during surge

Manual:
1.Podłączyć red terminal device (+) to clamp connected to the battery positive terminal and the black clamp to the negative (-).
2.Zaświecenie the LEDs on the device, in green indicates correct connection.
3.Zaświecenie a red LED on the device and an acoustic signal is audible reverse polarity. Change any terminal connected to the battery.

12V and 24V
